ExecuTrain®

Digital and remote training solutions

Training is evolving and so are we...

We live in a time of unprecedented technological growth that changes the way we perform tasks and provides us with excellent solutions to improve productivity, efficacy and deliverability. Training is no different.

At Executrain, we like to stay ahead of the technology curve and make sure that we offer all the digital solutions that we can to enhance our services and provide you with the most effective training, delivered in the mostly advanced manner. Because of this, we would like to introduce you to two truly exciting digital products that will change the way that you see training. Contact training is no longer seen as the most effective training and a purely online, self-study solution is equally ineffective. These two solutions will show you just how effective a blended solution can be, without sacrificing all the benefits of having a facilitator at hand to explain concepts more deeply and to answer the difficult questions.

1. Panopto

Panopto is our education video platform that allows anyone to join our industry-leading facilitatior training remotely.

Panopto™

All training provided by Executrain will be recorded and uploaded to the Panopto platform.

Video will help increase the effectiveness of the training, improve the consistency of learning content, scale L&D efforts to a global workforce, enable social knowledge sharing, and of course, lower costs. For corporate learning and development, video is more than a nice-to-have – it's a necessity. Panopto will allow users to not only view the training, but it will allow them to search text, audio and video; complete assessments, interact with other users and provide valuable feedback.

About Panopto

Panopto is a Video Content Management System (VCMS) with specific support for usage in support of learning and communication. Panopto addresses and automates all stages of Rich Media (video session) capture, production, packaging, storage, and distribution for viewers on diverse platforms. Panopto integrates with leading Learning Management Systems (LMS) as well as leading enterprise platforms including Sales Force, Microsoft Active Directory and Microsoft SharePoint. This enables learners and employees to have seamless access to Panopto content via their institutional platform of choice.

Panopto allows for integration using a rich Application Program Interface (API). Panopto provides links and embed codes to individual sessions as well as collections to be incorporated into documents, blogs, etc.

Panopto combines multiple recorded streams in a single session. Streams include video, audio, secondary video, screen capture, and presentation capture. Captioning is supported, as well as the uploading of supporting documents. Video sessions can have embedded links to external content including forms, surveys, quizzes etc. Panopto removes technical complexity and enables a 'single-click' recording experience allowing the educator, trainer, or presenter to focus on what they do best. Panopto supports live webcasting. Recorded sessions can be scheduled for release and workflow supports publishing approval if required.

Viewers only see content they are entitled to see. Viewers can search across video libraries and within video sessions for spoken or written words, enabling them to get directly to content they are seeking. Viewers can bookmark and makes time synchronized notes, as well as rate the content as a feedback mechanism to presenters. Viewers can subscribe to content areas.

Based on the viewer's platform and bandwidth scenario, Panopto intelligently combines and repackages streams to maximize the viewing experience in real time conditions. Panopto provides analytics of usage and viewing.

The above delivery will provide users with a highly immersive experience

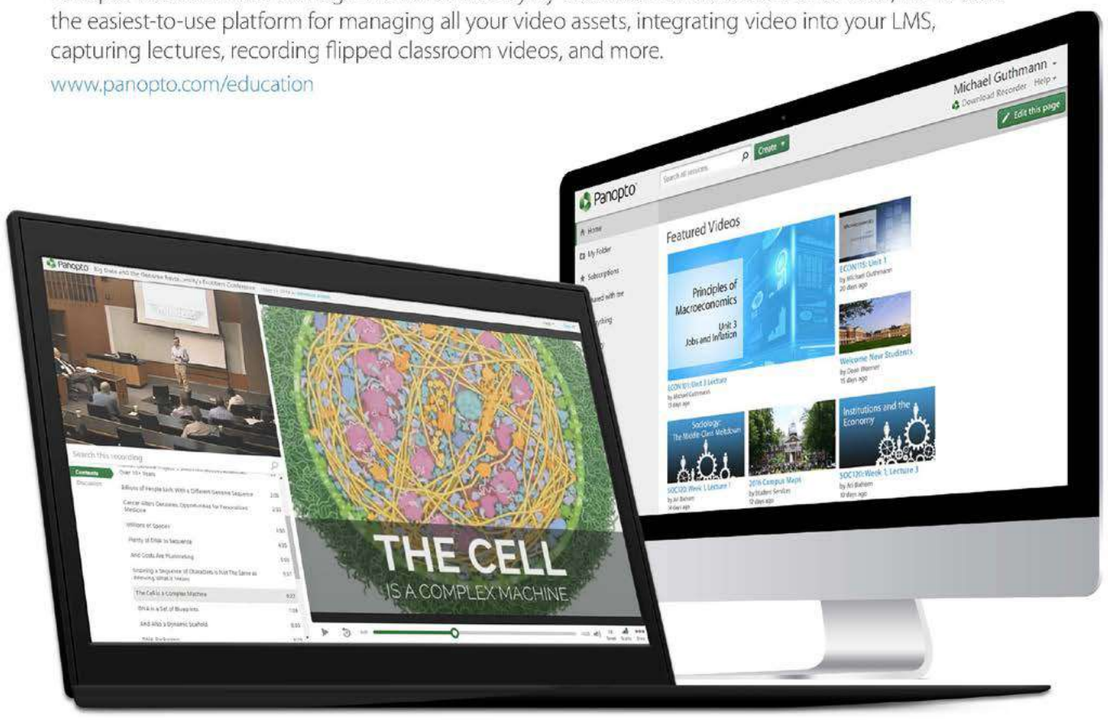
The leading education video platform

Panopto was created at Carnegie Mellon University by educators for educators. Since 2007, we've built the easiest-to-use platform for managing all your video assets, integrating video into your LMS, capturing lectures, recording flipped classroom videos, and more.

www.panopto.com/education



The easiest-to-use video management system

With Panopto, the University of Arizona integrates video directly with its LMS, optimizes storage to balance playback and cost, and simplifies technical support and administration. All of which is critical, because UA students now watch a quarter million hours of video annually.

The most flexible tools for capturing and streaming video

At Wharton, Panopto enables the school to instantly provision any lecture hall with any recording equipment. At Butler, Panopto allows faculty to capture and share flipped classrooms with ease. And at Sauder, Panopto helps the team record 400 student presentations every week.

The industry's top-rated customer service and support

"There are so many products out there that promise great capture, but no other solution delivers support like Panopto." Jimmy Lieu, Director of IT at the Wharton School of the University of Pennsylvania, is just one of the voices that have given Panopto Support a 99% positive rating — 5 years running.

The world's top academic institutions choose Panopto:

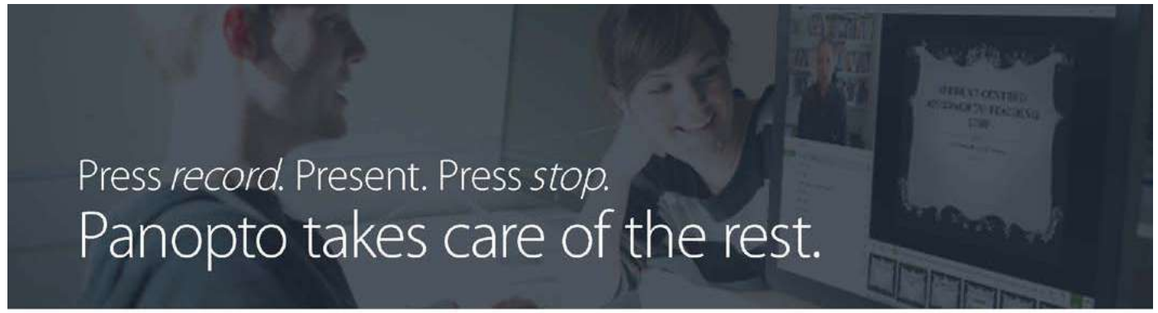
UNIVERSITY OF OXFORD

UNIVERSITY OF MICHIGAN

Berkeley UNIVERSITY OF CALIFORNIA

UNIVERSITY of WASHINGTON

(855) 726-6786 | sales@panopto.com



Press *record*. Present. Press *stop*.
Panopto takes care of the rest.

Record

Easy-to-use video capture for Windows, Mac, and iOS. Schedule recordings ahead of time for worry-free lecture capture.

Webcast

Live stream your presentation at the click of a button. Webcast to ten people across town or 10,000 around the world.

Search

Find any word spoken or shown on-screen in any video in your library. Panopto's search is the industry's best.

Manage

Panopto has been named a Leader 4 years in a row in Gartner's Magic Quadrant for Video Management.

Upload

Panopto automatically converts your existing video files for playback on any device and makes them searchable.

Stream

Efficiently deliver video across your network and over the Internet to viewers worldwide

Play

Engage students with interactive video players that support multi-camera HD playback, search, digital notes, and more.

Edit

Our video editor makes it easy for anyone to accomplish common editing tasks, right from any web browser.

Analytics

Get insights into which videos are most popular, who watched which videos, video engagement, and more.

Mobile

Native apps for iOS & Android bring viewing, search, discussions, and more right to students' mobile devices.

Integrate

Connect Panopto with your identity provider, LMS, and CMS, our extend our functionality using our open APIs.

Service

Our support has earned 99% customer satisfaction, 3 years running. Best of all, it's included standard in every license.

2. Agylia

Agylia is more than an ionlibne academy and LMS, but a thorough digital learning experience.

The Agylia LMS brings you all the benefits of the very latest technology in a proven solution to help you achieve your current and future needs.
Agylia is a global leader in the provision of learning management and mobile learning solutions, coupled with the design and creation of innovative and engaging bespoke eLearning programmes. It provides custom branded, fully responsive learner portals that delivers a fantastic user experience. Administrators are equipped with a powerful admin console to monitor the platform, track learning activities and manage users and content.

What is Agylia?

Agylia is an innovative, world leading learning solutions provider and is part of CM Group Ltd. They have offices in the UK and Washington State, USA, and partner with some of the largest and most demanding organisations in the world to develop and implement Learning Management Solutions, eLearning and mobile learning solutions. Their services include content creation as well as the supply of the class leading Agylia LMS.

They are a Premier Supplier to Microsoft for their global, multi-lingual courseware, and we are a close content creation partner for the Health & Social Care Information Centre, the UK's central data resource for national healthcare. They supply to many diverse organisations including Atos, O2 Telefonica, RBS Bank, Deloitte, Johnson and Johnson, the British Government's Foreign Office (includes all global embassies) and Microsoft Corp.

Why choose Agylia?

- Modern, attractive and engaging UX
- Class leading mobile learning Apps
- True cloud scalability and security
- Multi-portal support for the extended enterprise
- Native mobile learning Apps for iOS and Android devices
- Class leading BYOD support
- Offline tracking with auto re-sync
- Push notifications
- Social learning

Agylia provides for resources section where users can look up any 'self-help' document or video at their point of need. This allows the flexibility of having all the resources easily at hand when needed as well as the comfort to the users that all assistance is available to them immediately. Since Agylia is a live, cloud based system new versions can be uploaded at any point in time and all users will immediately have access to the new version and be notified that there is an updated resource available to them. These resources can be in a variety of formats including PDF's, PowerPoint presentations, Word documents, Excel sheets, eBooks, video podcasts or full SCORM files.

Agylia has the ability to provide a variety of formats of training material. This allows for all pre-training, including eLearninig, Podcasts and Assessments to be completed and scored before any training intervention is approved.
Full eLearning courses, in the form of SCORM, HTML5 files or microlearning can be delivered via this platform.

Key features

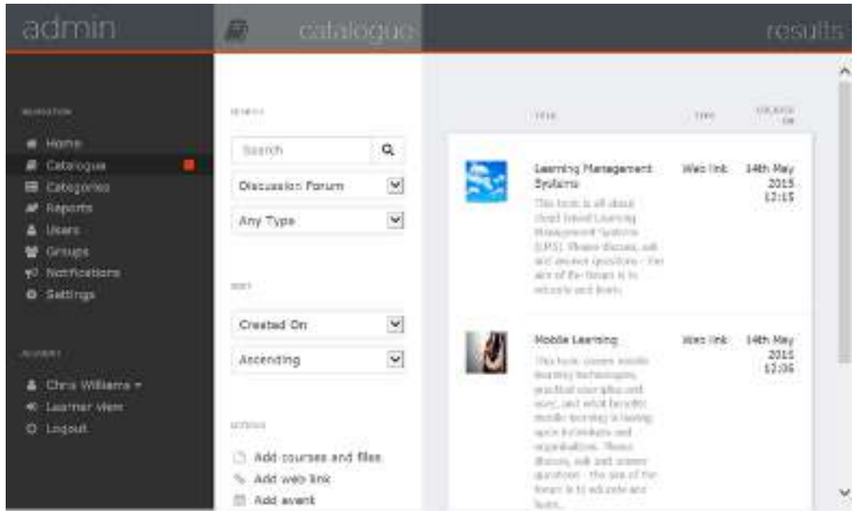
The following is a summary of the key features that differentiate Agylia from their competitors:

- Agylia is a SCORM as well as next generation Experience API or xAPI (previously called Tin Can) compliant platform
- Full xAPI Learning Record Store (LRS) capability
- Full support for Microsoft Internet Explorer Version 8 and above and latest versions of Edge, Google Chrome, Firefox and Safari
- Full BYOD mobile support for delivery of learning and reference resources and offline consumption and tracking via native Apps, available for iOS and Android smartphones and tablets
- Modern and attractive, fully responsive learner portal user interface which can be fully branded
- Optional separately branded sub-portals for different learner communities (note: if not chosen, then content is targeted onto each of your designated learner groups from a single portal)
- Optional language packs for localisation of the user interface (note: the Admin interface is available in English only)
- Full user management facility including delegated administration
- Full event scheduling capability including enrollment and cancellation workflow
- Supports any permitted digital content type for delivery out to devices (e.g. videos, PDFs, eLearning, mobile learning, games, Microsoft Office docs,veBooks, slide decks, etc)
- Content scheduling, reminder (alerts) targeting and reporting based on user, user group or organisational unit (geographical region). All these features available through the administrator dashboard
- Full certification (including imminent re-certification support for compliance or accredited content) management of any course or curriculum
- Webinar support and management
- Modern, next generation social discussion forum platform
- Social Forums connected to content items, rating of content as standard
- Optional rules driven gamification engine
- Supports independent learning activities enabling learners to record and upload files to support learning activities they have undertaken outside the system (e.g. they can upload certificates, essays, video files, etc)
- Hosted SaaS solution served by Azure and Amazon Web Services from ISO27001 accredited data centres
- Comprehensive notification based system for App users which augments email communication

What Agylia looks like

The administration portal

The Web based administration portal provides an extremely intuitive and easy-to-use administration experience for system administrators. Functionality provided by the admin portal includes user, group and content management, report generation, and systems configuration.



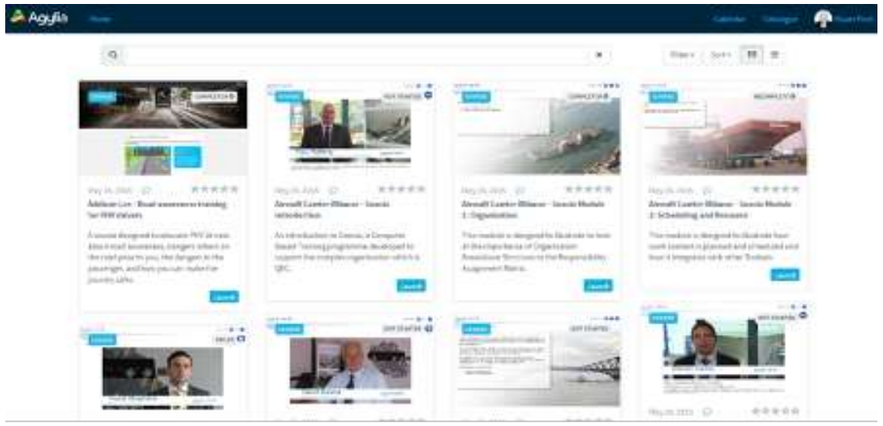
The Learner portal

The learner portal provides the Web based interface through which online learners interact with the system and are given access to content, calendars, profile data, etc.

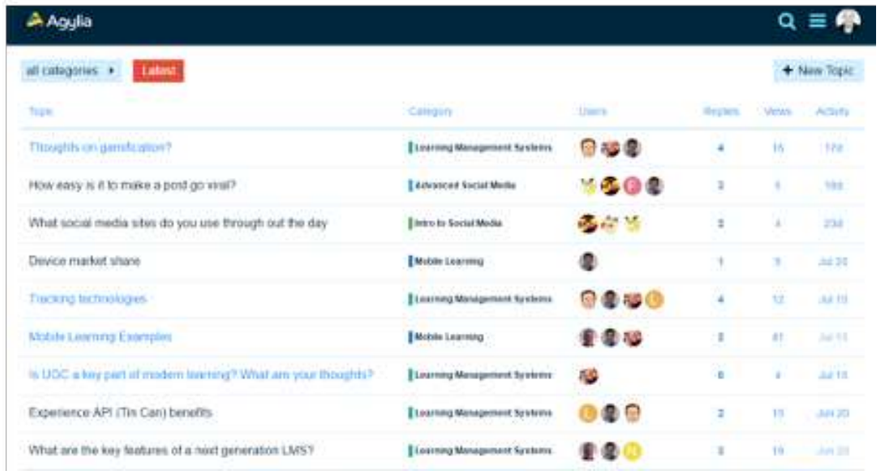
The Agylia LMS user interface will be branded for you, in its standard form it looks like this:

Home

Catalogue



Discussion Forum



The learner portal is fully responsive which means it automatically detects the device type the learner is using and rearranges the content, laying it out to take best advantage of the screen size and orientation of the learner's chosen device.

App based delivery

The Agylia LMS comes with a set of native Apps for iOS and Android. The standard online user interface supports users browsing to the LMS from any device. The Apps extend the usefulness of the Agylia system by enabling learners to download content onto their mobile device and then go offline. This is very useful for users when they are travelling or when they are out of signal range and need access to training, reference and support.

Examples of the types of content that the App can deliver are as follows:

- Formal SCORM or Experience API enabled eLearning
- Responsive HTML5 just-in-time learning nuggets
- Job aids and performance support tools such as price calculators, product selectors, diagnostic aids, job sheets, checklists etc
- Reference materials such as eBooks, PDFs, etc
- Office documents such as PowerPoint slide decks, excel spreadsheets and word docs
- Social Channels for discussion forums so people can ask questions and get peer-to-peer support
- Optional gamification engine to encourage usage and elements of competition
- Video podcasts
- The above delivery will provide the Masterclass with a highly immersive experience
